Wireless Cassette Speaker

An idea by Nick Forrester
made by Suck UK

Nick (aka Fozz) is Staffordshire born and raised but now lives and works here in London. He is obsessed with design in all forms and regularly attends exhibitions, galleries, and trade shows for fun, with his yearly highlight being Dutch Design Week. From finishing University with a First in Product Design, he now works for us at Suck UK as a Product Developer, but still submits his ideas with the hope of getting them produced. Some of Nick's designs include; UFO Storage Jar, Send a Sound, TV Lunch Box, and My Gardening Handbook which was inspired from his experience in Horticulture and Arboriculture. Gaining knowledge and inspiration from anything and everything, who knows what he'll come up with next.
