ILLUMINATING IDEAS

## Store sunshine for the night time

Inside the jar there is an efficient solar cell, a rechargeable battery and LED lamp. At night the LED lamp glows for 5 hours on a full charge.

**Solar Power**  
A solar panel charges the battery during the day. Sun Jars work best in direct sunshine, outside or in a sunny window.

## Sun Jar

Code: SK SUNJAR1

<b>Material</b>	Glass jar, stainless steel clasp, rubber seal, solar panel, LED
<b>Pack Size</b>	12
<b>Pack type</b>	Full colour printed box
<b>In pack</b>	W126 x H201 x D126mm
<b>Design</b>	Tobias Wong

### Solar powered light inside a frosted glass mason jar

Capture some sunshine for night-time!  
Switches on automatically when it gets dark.  
A beautifully simple night light.

### Use outside or indoors

A perfect garden light or night light for a bedroom.  
Mason Jars are traditional, beautiful and watertight by their very nature, so the Sun Jar can with stand even the wettest of summers.

### Automatic night light

You may have noticed that there is no switch on the Sun Jar - in fact there are no visible controls at all. A light sensor switches on and off automatically when it gets dark or light. Sun Jars MUST be in the dark to light up. Frosted glass diffuses the light, giving the ambient appearance of sunlight.

# PANORAMA

## FRAMED 3D ART

Panorama is our collection of 3D artworks, based on the real life wonders of the earth's surface.

Designed to hang as unique wall art, or as decorative desk adornment, the first series in the Panorama collection focuses on 'World's most iconic landmarks'.

Produced ethically and sustainably in the UK, our core range is available in a timeless clean white / rich grey colour combination and packaged in a stylish card gift box.

Sparked an idea? We're very happy to discuss bespoke locations, landmarks, landscapes, colourways and scales. We can produce in very sensible volume and with unbelievably good turnaround times, to almost any specification.

Our cityscapes are manufactured locally by an array of robotic 3D printers, using bio-plastics derived from plant sugars, which make these fully recyclable.

Looking for a specific area or colour combination? Talk to us about customisation.
