

Key Target

Throw your keys at the magnetic target.

Key Target, reminiscent of Jasper Johns' mid-century paintings, is an iconic pop-art statement. With the addition of several strong unseen magnets, "Key Target" becomes a place to store easy-to-misplace metal items such as keys. Simply toss the item toward the Beech wood target and it affixes immediately. Mundane daily routines turn into playful ones. The surprising functionality elicits an emotional response, heightened whenever hitting the bulls' eye.
