

Smartphone Magnifier

Luckies' hands free way to watch movies and videos off your phone

Ever been in the bath and wanted to watch Netflix but the only safe spot for your phone to lean was too far away to make out Walter White's face clearly? Or been showing a video of a cat eating a burger on your phone to a group of friends and thought, my arm hurts? Well Smartphone Magnifier is here to help your mobile content sharing woes and in retro-style too. Smartphone Magnifier is a lo-fi, hands free way to watch movies and videos off your phone at twice the original size. Just load your phone into the retro-styled cardboard TV and enjoy all your mobile content (feline videos included) on an 8" screen. You're welcome.
