

Inkwell Desk Tidy

Classic glass pencil pot.

- Green tinted soda glass.
- Organise your writing tools.
- Modern take on a timeless classic.
- Pretend you are a Victorian scholar.
- Plastic free product and packaging.

An oversized pen pot designed in the style of a classic inkwell. Made from heavyweight green-tinted soda glass with plenty of space for your writing tools or art equipment. A modern take on a timeless (but sadly extinct) desktop accessory - and you don't even need a quill. Made from heavyweight green tinted glass.

Inkwell Desk Tidy

An idea by j-me
made by Suck UK

j-me is a global product design company, that has become known for producing original home products that have a sense of humour and a love of design. Located in the creative hub of london's oxo tower, j-me has a unique ethos that results in a range of functional products that are original and fun. j-me was founded by brothers Jamie and Mark in 2000 with a desire to create original and entertaining products for the design conscious home owner. With both Jamie & Mark's passion for design (they studied at Central Saint Martins - the world leading centre for art and design education) and entrepreneurial spirit, the brothers launched j-me original design, in their late twenties. With humble beginnings, they started the company whilst living together at their parents' home in North London. Their Mum's lounge was often transformed into a picking and packing operation. However, by 2007 j-me had not only won 2 coveted design awards, but had also successfully exported the brand globally and moved into a prestigious new design studio in the design capital of the world. j-me's core values are as clear now as when they first started out and are what make the products unique. All products are 100% original design, always with a twist of humour and focus on superior function and high quality.
