

Cordless Rainbow Lightbulb

Rechargeable, sexy and proud.

- USB Rechargeable internal battery
- Hold an illuminated lightbulb in your hands.
- Rainbow shaped filament powered by battery.
 - Night light, table decoration, sexy thing.
 - No heat / No electric shocks.
- No witchcraft involved / Just modern technology.
- Glass & Metal construction / Quality look & feel.
 - 6 hour battery life on a 1.5 hour charge.

Seemingly magic bulb, lights up without plugging in or attaching to a lamp. Looks and feels identical to the iconic filament light bulb. Power-cord free, rechargeable and portable. Our homage to the timeless, beautiful and humble light bulb. We have used over 100 tiny LEDs to recreate the look and feel of a traditional incandescent filament from the classic Edison light bulb. Powered by an internal battery with a 6 hour life on a 1.5 hour charge. If Edison could see this, he would be turning in his grave.

A small note on safety - this light bulb cannot (even accidentally) be screwed into a mains light fitting, we have designed it specifically to be slightly too large to fit.

Designed and made by Suck UK

Cordless Rainbow Lightbulb

An idea by Suck UK Design Team
made by Suck UK

Mark E Smith once said "if it's me and your granny on bongos, it's the Fall". It's a lot like that here - if it's Sam & Jude and a revolving team of talented creatives, it's Suck UK. From the inception of the company in 1999 Sam & Jude have been the constant driving creative force, but none of that would be possible without a great team of designers and developers who turn these ideas into something great. Once a Sucker always a Sucker.
