

Stormtrooper Helmet Lamp

The iconic character as a ceramic lamp.

- Illuminating ceramic Stormtrooper helmet.
- Made from bright white gloss glazed ceramic.
- Internal LED lights shine through the surface.
- USB powered with on/off switch on the cable.
 - Bring your own Power Supply...
 - Runs from your old phone charger!

Detailed replica of the Stormtrooper helmet from the 1976 movie. Realistically detailed in every way - made out of ceramic... with a light inside. The supplied low-power LED light mounts inside and shines through the ceramic creating a warm glow and highlighting the accurate detail created by the varying thickness of the features.

Andrew Ainsworth of Shepperton Design Studios originally created iconic characters such as the Stormtrooper in 1976. This product is modelled from the original helmets produced for the movie. Those originals were hand made, and not perfectly symmetrical. This wonky charm is intentionally replicated here!

Sorry - Not available in the USA

Stormtrooper Helmet Lamp

An idea by Suck UK Design Team
made by Suck UK

Mark E Smith once said "if it's me and your granny on bongos, it's the Fall". It's a lot like that here - if it's Sam & Jude and a revolving team of talented creatives, it's Suck UK. From the inception of the company in 1999 Sam & Jude have been the constant driving creative force, but none of that would be possible without a great team of designers and developers who turn these ideas into something great. Once a Sucker always a Sucker.
