

Cordless Flame Lightbulb

Kitch, flickering effect, rechargeable.

- USB Rechargeable internal battery.
 - Hold a flame in your hands.
 - Switch between on / off / flicker.
 - Looks like fire / cool to the touch.
 - Modern technology, not witchcraft.
 - Glass & Metal / Quality look & feel.
 - 6h battery life on a 1.5h charge.
 - Metallic golden bronze coated glass.
 - Strange variant of a SuckUK Classic.
- Power-cord free, rechargeable & portable.

A throwback to the days when your gran had fake electric candles in her fake chandelier. This seemingly magic bulb lights up without plugging it in! switch between classic & flickering effect. Our homage to the 1970's candle flame effect lightbulb is cordless, rechargeable and beautiful. Recreates the classic look of old-school candelabra lamps, but does not need to be attached to a lamp or require plugging in. We have used tiny LEDs to recreate the look and feel of a traditional light-bulb with a twisted glass flame shaped bulb. Powered by an internal battery with a 6 hour life on a 1.5 hour charge.

 A small note on safety - this light bulb cannot (even accidentally) be screwed into a mains light fitting, we have designed it specifically to be slightly too large to fit.

Designed and made by Suck UK

Cordless Flame Lightbulb

An idea by Suck UK Design Team
made by Suck UK

Mark E Smith once said "if it's me and your granny on bongos, it's the Fall". It's a lot like that here - if it's Sam & Jude and a revolving team of talented creatives, it's Suck UK. From the inception of the company in 1999 Sam & Jude have been the constant driving creative force, but none of that would be possible without a great team of designers and developers who turn these ideas into something great. Once a Sucker always a Sucker.
