

Jack Rabbit

Headphone splitter, share with friends.

- Plug in 2 sets of headphones
- 2 people can plug in at once.
- Wired Headphones are cool again!
- The ears are the headphone jacks!

A new sociable way to be anti-social, share your music in full stereo and not just in one ear. No longer will you just hear the drum beat while your friend gets the awesome guitar solo. With Jack Rabbit Headphone Splitter you both use your own headphones but listen to the exact same song, at the exact same time, from the exact same device. Just plug 2 pairs of headphones into the Rabbit's ears. Fully compatible with the controls and mic on iPhone and other devices.

Jack Rabbit

An idea by Suck UK Design Team
made by Suck UK

Mark E Smith once said "if it's me and your granny on bongos, it's the Fall". It's a lot like that here - if it's Sam & Jude and a revolving team of talented creatives, it's Suck UK. From the inception of the company in 1999 Sam & Jude have been the constant driving creative force, but none of that would be possible without a great team of designers and developers who turn these ideas into something great. Once a Sucker always a Sucker.
