

Floating Light

Rechargeable light turns glasses into lamps.

- Floating cork light
- Put into a glass of water and add the paper shade
 - Recharges via USB in 1 hour
 - Runs for 3 hours when fully charged

Turn your favourite glass into a lamp, fill with water and float the light on top. An improvised table feature that creates a great atmosphere. Different glasses create different lighting effects. The floating light is water resistant, uses a super bright LED and is charged by USB. The perfect gift for any hopeless romantic.

Designed and made by Suck UK

Floating Light

An idea by Suck UK Design Team
made by Suck UK

Mark E Smith once said "if it's me and your granny on bongos, it's the Fall". It's a lot like that here - if it's Sam & Jude and a revolving team of talented creatives, it's Suck UK. From the inception of the company in 1999 Sam & Jude have been the constant driving creative force, but none of that would be possible without a great team of designers and developers who turn these ideas into something great. Once a Sucker always a Sucker.
