Cat Scratch Laptop

Cardboard toy for geeky cats.

- Laptop shaped cat scratching mat.
- Entertaining interative 'track pad'
- Includes entertaining fluffy toy 'mouse'.
- No assembly required - stores flat.
- Keep claws maintained, strong & healthy.
- Stop your cat scratching your furniture.

Does your kitty feel left out while you are busy on your laptop? Now everyone can be on Facebook, even your cat. Tiddles will love getting her claws stuck into the irresistibly scratchy cardboard keyboard (and it will keep her from tearing up your furniture). If you want to upgrade the operating system or install new applications, simply print a new screen on paper and slide it inside. A great gift for your nerdy cat.

Cat Scratch Laptop

An idea by Suck UK Design Team

made by Suck UK

Mark E Smith once said "if it's me and your granny on bongos, it's the Fall". It's a lot like that here - if it's Sam & Jude and a revolving team of talented creatives, it's Suck UK. From the inception of the company in 1999 Sam & Jude have been the constant driving creative force, but none of that would be possible without a great team of designers and developers who turn these ideas into something great. Once a Sucker always a Sucker.
