Solar System Erasers

Tiny planets made from rubber.

- 8 mini erasers shaped like planets.
- Educational gift for astrophysicists.
- Erase with space!
- Neptune, Uranus, Saturn, Jupiter,
Mars, Earth, Venus and Mercury

Hold the universe in your hands and explore space without the hassle of leaving home. A scale model of the solar system made out of erasers. Well… Not the whole solar system, just the 8 large planets orbiting the Sun (the Milky Way contains at least 100 billion planets, that's too many to fit in the packet). And, well… not exactly to scale (the vast size difference of the planets is such that Jupiter would have to be the size of football, also too big to fit in the packet). An educational gift for budding astrophysicists.

Designed and made by Suck UK

40 x 40 x 10mm | 13g x 8

Solar System Erasers

An idea by Suck UK Design Team

made by Suck UK

Mark E Smith once said "if it's me and your granny on bongos, it's the Fall". It's a lot like that here - if it's Sam & Jude and a revolving team of talented creatives, it's Suck UK. From the inception of the company in 1999 Sam & Jude have been the constant driving creative force, but none of that would be possible without a great team of designers and developers who turn these ideas into something great. Once a Sucker always a Sucker.
