

Cordless Heart Lightbulb

Battery powered, rechargeable and sexy.

- USB Rechargeable internal battery.
- Hold an illuminated lightbulb in your hands.
- Heart shaped filament powered by battery.
 - Night light, table decoration, sexy thing.
 - No electric shocks / Just shocking pink.
 - No witchcraft / Just modern technology.
 - Glass & Metal / Quality look & feel.
- 6 hour battery life on a 1.5 hour charge.

This seemingly magic bulb lights up without plugging it in! Heart-shaped pink filament in glass. Our homage to the humble Edison lightbulb is cordless, rechargeable and beautiful. Recreates the classic look of old-school filament lamps with a warm pink heart. Stand alone light bulb. Looks and feels identical to the iconic filament bulb, but does not need to be attached to a lamp or require plugging in. Power-cord free, rechargeable and portable. Timeless and beautiful with a sexy twist. We have used tiny LEDs to recreate the look and feel of a traditional Edison bulb with a shocking pink, heart shaped filament. Powered by an internal battery with a 6 hour life on a 1.5 hour charge. If Edison could see this, he would be turning in his grave.

 A small note on safety - this light bulb cannot (even accidentally) be screwed into a mains light fitting, we have designed it specifically to be slightly too large to fit.

Cordless Heart Lightbulb

An idea by Suck UK Design Team
made by Suck UK

Mark E Smith once said "if it's me and your granny on bongos, it's the Fall". It's a lot like that here - if it's Sam & Jude and a revolving team of talented creatives, it's Suck UK. From the inception of the company in 1999 Sam & Jude have been the constant driving creative force, but none of that would be possible without a great team of designers and developers who turn these ideas into something great. Once a Sucker always a Sucker.
